

PROJECT STATUS REPORT

Project Name	Humanities and Engineering Special Interest Group (SIG, CEEA) Networking Platform Project
For Week Ending	April 5, 2024
Project Status	Green
Status Description	We have to finish the sections on map projection by now, but there are a few minor problems. This weekend, we have come to a resolution.

Activities—During the Past Week

The activities that were worked on this past week were:

Stephanie Ndulue - looking for ways to edit the add friend button without paying for the premium

Jiwoun Kim - Implementing members' projection on the Canadian map. Explored better plugins for the map functionality (Open Street Map, Google Map, ProfileGrid, and Open User Map).

Vishva Shah -completed a language bilingual support task using a new plugin.

Pratik Gadhiya: Design home page thoroughly and website cleaning.

Activities—Planned for Next Week

These are the activities that will be done next week by team members:

Stephanie Ndulue: redesign the home page and website cleaning

Jiwoun Kim: Finish up the members' map projection on the map. Research Interest implementation.

Pratik Gadhiya: Explore more plugins for map and bilingual support. Work on home page and after completing these, I will help in other pages.

Vishva Shah: facing styling issues after integrating a new plugin for language bilingual support and plans to work on resolving them.

Project Issues

We have some issues because our home page layout changed during the bilingual function.

Project Changes

The communications section and about us page of the website was removed according to the

customer's request as it was deemed confusing and a feature that might not be used often.
