

## **Manager's Comments Document**

**Date:** April 5, 2024

### **Project Team Members:**

Stephanie Ndulue

Vishvaben Pradipbhai Shah

Jiwoun Kim

Pratik Gadhiya

### **Comments:**

- There is a lot of "real estate" that is left on the home page. Redesign the home page to be more welcoming for interaction
- Look for a way to emphasize the logo that we used for the website
- Rethink about the functionality of the activity tab and how users can keep track of previously posted activities
- If you cannot completed a feature or user experience, remove it and include it in the next MVP release reschedule
- Clean up unnecessary information on the website
- Consider using a different plug in for the map feature
- Present the features/user experiences of the website to the customers during the next meeting
